Our Way of life and our very existence are under threat. Get educated and resist. In Aldous Huxley's *Brave New World*, published in 1932, we are provided with a view into a possible future that shows humanity under total control. It's a world in which babies are created in the laboratory to fit specific job functions and a small number of savages live in the restricted wild lands. *Journey to a Brave New World* uses examples of news reports and the real history— not always the version taught in the classroom —to show how we are being managed and manipulated to allow for a total tyrannical takeover and massive depopulation that could lead us to Huxley's vision. For over six years, author David Watts has undertaken deep research into the real history of the world and the ways in which it is being manipulated toward a future that only benefits an elite few. He provides many news reports, official documents and quotes from the so called 'elites' to piece the puzzle together. He presents a cohesive exploration of what to expect in the future if we don't become involved in determining our own fate. *Journey to a Brave New World* seeks to help everyone to put the pieces together, deprogram, and understand both how we are being manipulated and how we can change direction now.

Aldous Huxley's prophetic novel of ideas warned of a terrible future then 600 years away. Though *Brave New World* was published less than a century ago in 1932, many elements of the novel's dystopic future now seem an eerily familiar part of life in the 21st century. These essays analyze the influence of *Brave New World* as a literary and philosophical document and describe how Huxley forecast the problems of late capitalism. Topics include the anti-utopian ideals represented by the rigid caste system depicted, the novel's influence on the philosophy of "culture industry" philosophers Max Horkheimer and Theodor Adorno, the Nietzschean birth of tragedy in the novel's penultimate scene, and the relationship of the novel to other dystopian works.

" Scare headlines about the first human clones appear in our newspapers. Biotech companies brag about manufacturing human embryos as "products" for use in medical treatments. Events are moving so fast—and biotechnology seems so complicated—that many of us worry we can't keep up. But now, Wesley J. Smith provides us with a guide to the brave new world that is no longer a figment of our imagination, but a reality just around the corner of our lives. Smith unravels the mystery of stem cells and shows what's at stake in the controversy over using them for research. He describes the emerging science of human cloning—the most radical technology in history—and shows how it moves forward inexorably against the moral consensus of the world. But at the core of this highly readable and carefully researched book is a report on the gargantuan "Big Biotech" industry and its supporters in the universities and the science and bioethics establishments. Smith reveals how the lure of huge riches, mixed with the ideology of "scientism," threatens to impose on society a "new eugenics" that would dismantle ethical norms and call into question the uniqueness and importance of all human life. "At stake," he warns, "is whether science will continue to serve society, or instead dominate it." In *Consumer's Guide to a Brave New World*, Smith presents a clear-eyed vision of two potential futures. In one, we will use biotechnology as a powerful tool to treat disease and improve the quality of our lives. But in another, darker scenario, we will be steered onto the antihuman path that Aldous Huxley and other prophetic writers warned

against half a century ago. "
