 Habitat Requirements of Wetland Birds in the Lower Waitaki River Catchment, New Zealand TOKYOPOP Verlag
 Containing thousands of entries of both vernacular and scientific names of Great Plains plants, the literature that informs this exhaustive listing spans nearly 300 years. Author Elaine Nowick has drawn from sources as diverse as Linnaeus, Lewis and Clark, and local university extension publications to compile the gamut of practical, and often fanciful, common plant names used over the years. Each common name is accompanied by a definitive scientific name with references and authority information. Interspersed with scientifically-correct botanical line drawings, the entries are written in

standard ICBN format, making this a useful volume for scholars as well as lay enthusiasts alike. Volume 1 presents, in alphabetical order, all the historical common names of plants recorded in Great Plains flora, herbaria, and botanical collections, together with the scientific names of species to which those common names have been applied.
